TYPEFACE

Newsreader – one family, everything

PALETTE

Twelve tokens, one accent

SOURCE OF TRUTH

app/globals.css · app/layout.tsx

COMPILED

7 August 2026

Newsreader, *and nothing else.*

A single serif carries the whole site – headlines, body, navigation, form fields and buttons. There is no secondary sans-serif. Newsreader is served from Google Fonts through Next.js, so it ships with the page rather than loading from a third party at runtime.

CSS stack `var(--font-newsreader), Georgia, serif`
Loaded weights 300 · 400 · 500 · 600 / normal + italic / latin subset / display: swap
Exception the generated favicon and social share image use the system sans-serif – they are rendered images, not brand typography.

Judgement before volume	300 · LIGHT
<i>Candour over comfort</i>	300 · LIGHT ITALIC
Partnership beyond the hire	400 · REGULAR
<i>Beyond the brief</i>	400 · REGULAR ITALIC
Market context in every recommendation	500 · MEDIUM
Experienced talent professionals	600 · SEMIBOLD

Set light, set large, set *tight*.

Display sizes are fluid – they scale with the viewport between a floor and a ceiling.
Everything below is shown at its real size on this screen, with the exact CSS beside it.

Recruitment, *as it should be*.

HOME HERO
clamp(56px, 9.2vw, 148px) · 300 · lh .94

A conversation costs nothing.

PAGE HERO
clamp(48px, 7.4vw, 116px) · 300 · lh .96

Beyond the Brief, *Into the Business*.

SECTION HEADING
clamp(38px, 5.4vw, 76px) · 300 · lh .98

Experience and *accountable follow-through*.

FEATURE HEADING
clamp(34px, 4.6vw, 58px) · 300 · lh 1

Grounded. Transparent. Unpretentious.

MID SUBHEAD
clamp(22px, 2.6vw, 30px) · 300

Tell us a little about what you are looking for.

LEDE
22px · 300 · lh 1.45 · ink-soft

Base body text, as set on the document root.

BODY BASE
19px · 400 · lh 1.55

Article body – the running text inside a Talent Perspectives post.

ARTICLE BODY

WHY WHITE GATE PARTNERS

EYEBROW · SECTION
12px · 500 · ls .22em · accent

Ink on paper, *never black on white.*

The site never uses pure black or pure white as a ground. Text is a warm near-black; the page sits on a soft grey-green paper, with a half-step darker tone to separate alternating sections.

--ink
#1d1e20
All primary text, buttons, the footer top border

--ink-soft
#4c4f51
Secondary copy — ledes, section subheads, captions

--paper
#e6e6e3
Page background and text reversed out on dark

--ivory
#dcdcd8
Alternating sections, a half-step down from paper

One colour, *used sparingly*.

A muted teal is the only chromatic colour in the system. It marks every eyebrow — page and section alike — plus italic emphasis in headlines, links, hover states and rules. Never large fields. The lighter variant exists solely for legibility on the charcoal sections.

--accent

#4E9B96

Eyebrows, italic headline emphasis, links, hover rules

--accent-2

#7ab8b4

The same accent, lightened for charcoal backgrounds

A neutral ladder for *surfaces and support.*

Four greys handle metadata, image placeholders and photo wells; charcoal is the dark ground behind the “How We Work” process sections and the site’s dark strips.

--muted

#7a7c7b

Dates, read times, footer fine print

--grey-dark

#8e8e8e

Photo wells; the favicon and share-image ground

--grey-mid

#a3a3a3

Image placeholders behind article and card photos

--grey-light

#b4b4b4

The lightest structural grey, for empty media

--charcoal

#26282a

Dark ground for the process and dark strip sections

The values that *aren't* tokens.

Hairlines, overlays and a handful of literals written directly into the stylesheet. Most are the ink or paper colour at reduced opacity, which is why borders sit on any background without banding.

	<code>rgba(29, 30, 32, 0.18)</code>	<i>--line · every hairline border and divider on light grounds</i>
	<code>rgba(255, 255, 255, 0.14)</code>	<i>Dividers inside the charcoal process sections</i>
	<code>rgba(230, 230, 227, 0.70 / 0.62 / 0.50)</code>	<i>Paper at opacity — headings and body copy on charcoal</i>
	<code>rgba(29, 30, 32, 0.55 / 0.28)</code>	<i>Ink at opacity — image scrim and de-emphasised type</i>
	<code>rgba(60, 90, 110, 0.42)</code>	<i>Cool tint laid over the homepage hero photograph</i>
	<code>#b3ac9f</code>	<i>Placeholder text in contact-form fields — the one warm grey in the system</i>
	<code>#fff</code>	<i>Used twice only — the About page photo tab and the WeChat QR panel</i>

The whole palette, *in one place.*

TOKEN	HEX	RGB	WHERE IT LIVES
 --ink	#1d1e20	29, 30, 32	All primary text, buttons, the footer top border
 --ink-soft	#4c4f51	76, 79, 81	Secondary copy – ledes, section subheads, captions
 --paper	#e6e6e3	230, 230, 227	Page background and text reversed out on dark
 --ivory	#dcdcd8	220, 220, 216	Alternating sections, a half-step down from paper
 --accent	#4E9B96	78, 155, 150	Eyebrows, italic headline emphasis, links, hover rules
 --accent-2	#7ab8b4	122, 184, 180	The same accent, lightened for charcoal backgrounds
 --muted	#7a7c7b	122, 124, 123	Dates, read times, footer fine print
 --grey-dark	#8e8e8e	142, 142, 142	Photo wells; the favicon and share-image ground
 --grey-mid	#a3a3a3	163, 163, 163	Image placeholders behind article and card photos
 --grey-light	#b4b4b4	180, 180, 180	The lightest structural grey, for empty media
 --charcoal	#26282a	38, 40, 42	Dark ground for the process and dark strip sections

All twelve tokens are declared on `:root` in `app/globals.css`. Change a value there and it propagates everywhere – nothing in the components hardcodes a palette colour except the seven literals on the previous page.
